

KODIAK FIRE STATION OPEN HOUSE

Tuesday, April 19th ~ 5:30-7:30pm
219 Lower Mill Bay Road

NEW FIRE STATION PROJECT OVERVIEW

The City of Kodiak Fire Station provides the primary response to accidents, emergencies, and fires throughout the City, Borough, and Island.

The 60+ year old facility cannot be upgraded to meet the current standards for an essential emergency facility. As Kodiak's only full-time staffed facility, these upgrades are essential to properly house, train and dispatch emergency responders. The new station will provide code-required decontamination, ventilation, and area separations allowing the station to serve as a Critical Facility and base of operations for the next 60 years.

Thus far, the City has completed selection of a site, space program, and project budget. Wolf Architecture was recently selected to lead the new station design effort towards completion of a Schematic Design and Cost Estimate--necessary for securing funding.

Come by, share a warm drink or cookie, and learn more about this essential project. Take part in shaping the future of emergency response for Kodiak!

PLEASE, JOIN US FOR AN OPEN HOUSE & SHARE YOUR INPUT!

MEET THE DESIGN TEAM

Wolf Architecture is a full-service architectural design firm based in Palmer, Alaska. Since 2000, Wolf has designed public safety facilities across Alaska. Along with their consultants, Wolf is excited to lead the effort on the new Station and looks forward to hearing from the citizens of Kodiak about what is most important for the project.
